

Robinson Street Corridor Planning Study PUBLIC WORKSHOP #2

Why? As Downtown Orlando continues to mature, Robinson Street is being asked to play many different roles. The Florida Department of Transportation, along with the City of Orlando, have been exploring strategies that can make it safer and more comfortable to travel along and across Robinson Street. The first public workshop explored the existing and future needs of the community. This second series of public workshops will explore the potential solutions resulting from the alternatives development phase of the project. Come to one or both of the workshops to share your thoughts as we explore how Robinson Street can better meet the needs of the community.
